

Appl. No.  
Amendment Dated September 12, 2003

**Amendments to the claims:**

This listing of claims will replace all prior versions, and listings, of claims in the application:

**Listing of Claims:**

Claims 1-34 (cancelled)

35. (New) A device, being adapted for mobile use, for wireless, coded access of incident data including video from a remote vehicle continuous, incident recording system, located on a vehicle, the device comprising:

- a) at least one interface for transmitting a code to the remote vehicle, continuous incident recording system to access the data;
- b) an information data link, coupled to the at least one interface for receiving the accessed data; and
- c) a transceiver coupled, at least indirectly, to the information data link, the transceiver adapted to transmit the accessed data from the remote vehicle continuous incident recording system located on the vehicle to the device or to a secure location separate from the device.

36. (New) The device of claim 35 further including an information storage device coupled to said vehicle incident recording system for capturing and storing said vehicle information.

37. (New) The device of claim 36 wherein said information storage device is selected from the group consisting of a video tape drive, a hard disk drive, a CD ROM drive, and a solid state repository.

38. (New) The device of claim 37 wherein said information storage device is adapted to prevent said vehicle information from being overwritten for extended periods of time.

39. (New) The device of claim 35 wherein said vehicle information comprises identification information.

Appl. No.  
Amendment Dated September 12, 2003

40. (New) The device of claim 35 wherein said vehicle information comprises video information.

41. (New) The device of claim 35 further comprising playing means for displaying said vehicle information.

42. (New) The device of claim 41 wherein said playing means comprises a visual display.

43. (New) The device of claim 41 wherein said playing means is adapted for playing audio information.

44. (New) The device of claim 35 wherein said vehicle information comprises audio information.

45. (New) The device of claim 35 wherein said vehicle information comprises time information.

46. (New) The device of claim 35 wherein said vehicle information comprises vehicle dynamic information.

47. (New) The device of claim 35 wherein said vehicle information comprises vehicle control information.

48. (New) The device of claim 35 wherein said interface is a second transceiver.

49. (New) The device of claim 48 wherein said transceiver includes a download trigger for initiating downloading of information from said recording system.

50. (New) The device of claim 49 wherein said download trigger is adapted to respond to the occurrence of a predetermined event.

Appl. No.

Amendment Dated September 12, 2003

51. (New) The device of claim 49 wherein said download trigger is adapted to respond to transmitted instructions.

52. (New) The device of claim 51 wherein said transceiver is adapted to download encrypted information from said recording system.

53. (New) The device of claim 52 wherein said device is further adapted to decrypt said information.

54. (New) The device of claim 35 wherein said transceiver provides a transmission link.

55. (New) The device of claim 54 wherein said transmission link is a direct satellite up-link/down-link.

56. (New) The device of claim 35 wherein said transceiver provides a transmission trigger for initiating transmission of information to an information storage device.

57. (New) The device of claim 56 wherein said transmission trigger is adapted to respond to the occurrence of a predetermined event.

58. (New) The device of claim 56 wherein said transmission trigger is adapted to respond to transmitted instructions.

59. (New) The device of claim 35 wherein said device is adapted for use in a vehicle.

59. (New) The device of claim 35 wherein the secure location is one or more of a hospital, a police station, and a fire station.

60. (New) The device of claim 35 wherein said interface is a limited access interface.

Appl. No.  
Amendment Dated September 12, 2003

61. (New) A method for coded access by a remote device, adapted for mobile use, of incident data including video from a vehicle continuous incident recording system, located on a vehicle, comprising:

a) transmitting a code from the device, having an interface for coded access to the data, to access the data; and transmitting the accessed data from the vehicle incident recording system to the remote device or to a secure location separate from the device using a transceiver coupled to the device.

62. (New) The method of claim 61, said information is selected from the group consisting of vehicle identification information, video information, audio information, time information, vehicle dynamic information, vehicle control information, and combinations thereof.

63. (New) The method of claim 61, said transmitting performed via a transmission link.

64. (New) The method of claim 63 wherein said transmission link is a satellite up-link/down-link.

65. (New) The method of claim 61, including capturing and storing said information.

66. (New) The method of claim 65, including storing said information remotely.

67. (New) The method of claim 65, including capturing and storing said information to a device selected from the group consisting of video tape, a hard disk, a CD ROM, and a solid state repository.

68. (New) The method of claim 65, including temporarily preventing said information from being overwritten.

69. (New) The method of claim 61, including encrypting said information.

Appl. No.

Amendment Dated September 12, 2003

70. (New) The method of claim 69, including decrypting said information.
